

12th International ERCOFTAC Symposium on Engineering Turbulence Modelling and Measurements

Montpellier (France) – September 26-28, 2018

Major Themes

Modelling, simulation and analysis methods for turbulent flows with heat and mass transfer, combustion and multiphase transport

Experimental techniques for flow, turbulence, combustion and environmental processes

Innovative application of modelling, simulation and experiments to unresolved issues in energy, health and the environment

Keynote Speakers

Sivaramakrishnan Balachandar – University of Florida, USA

Beverley Mc Keon – California Institute of Technology, USA

Oliver Paschereit – TU Berlin, Germany

Peter Schmid – Imperial College, UK

Philippe Spalart – The Boeing Company, USA

Luc Vervisch – INSA Rouen, France

Jerry Westerweel – TU Delft, The Netherlands

Deadlines

Abstracts due: January 26, 2018

Notification of acceptance: April 20, 2018

Final manuscripts due: June 29, 2018

Early registration: June 25, 2018

Organizing committee

Franck Nicoud – University of Montpellier, France

Bernard Geurts – University of Twente, The Netherlands

Ananias Tomboulides – Aristotle University of Thessaloniki, Greece

Stefan Hickel – TU Delft, The Netherlands

Dominic von Terzi – General Electric, Munich, Germany

Simon Mendez – University of Montpellier, France
